## 1 Introduction

## 2 Including an Image

## 3 Introduction

This report demonstrates basic Quarto functionality for data analysis and visualisation. It includes an image, loads a dataset from the web, and produces a scatter plot and a summary table using R and the tidyverse.

## 4 Including an Image

Figure 1: Penguins at Palmer Station

## 5 Data

```
library(tidyverse)
penguins <- read_csv("https://raw.githubusercontent.com/allisonhorst/palmerpenguins/master/i
penguins <- drop_na(penguins)
head(penguins)
```

```
# A tibble: 6 x 8
  species island  bill_length_mm bill_depth_mm flipper_length_mm body_mass_g
  <chr>   <chr>         <dbl>         <dbl>         <dbl>         <dbl>
1 Adelie Torgersen     39.1           18.7           181           3750
2 Adelie Torgersen     39.5           17.4           186           3800
3 Adelie Torgersen     40.3            18           195           3250
4 Adelie Torgersen     36.7           19.3           193           3450
5 Adelie Torgersen     39.3           20.6           190           3650
```

```
6 Adelie Torgersen          38.9          17.8          181          3625
# i 2 more variables: sex <chr>, year <dbl>
```

## 6 Visualisation

```
ggplot(penguins, aes(x = bill_length_mm, y = bill_depth_mm, color = species)) +
  geom_point() +
  labs(
    title = "Bill Length vs Bill Depth by Species",
    x = "Bill Length (mm)",
    y = "Bill Depth (mm)",
    color = "Species"
  ) +
  theme_minimal()
```

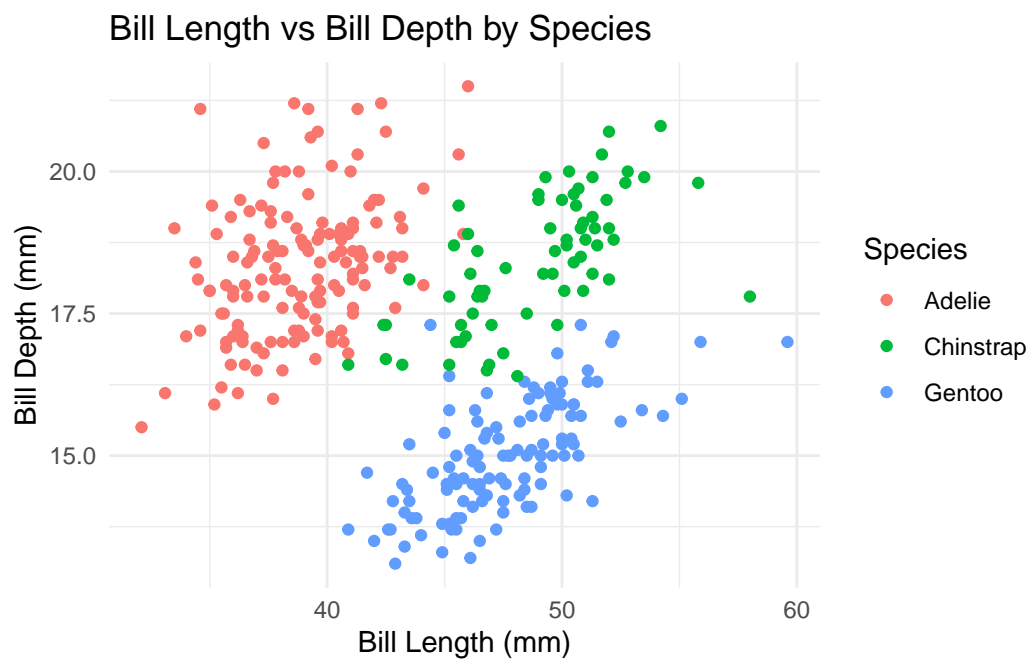

Figure 2: Bill length vs bill depth by species.

## 7 Summary Table

```
penguins %>%  
  group_by(species) %>%  
  summarise(mean_bill_length = mean(bill_length_mm, na.rm = TRUE)) %>%  
  knitr::kable()
```

Table 1: Mean bill length (mm) by species.

species	mean_bill_length
Adelie	38.82397
Chinstrap	48.83382
Gentoo	47.56807

## 8 Conclusion
